PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing enterprise-scale applications using Java, Spring Boot, REST APIs, PostgreSQL, AWS, and React.js. Experienced in backend development, microservices architecture, cloud deployment, and API integration for banking applications. Google Cloud certified, with 1200+ LeetCode problems solved and hands-on experience building AI-powered applications using the Gemini API.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Python

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Spring Boot, Node.js, REST APIs, Microservices

Cloud: AWS (EC2, S3, DynamoDB)

Databases: PostgreSQL, DynamoDB

Tools: Git, GitHub, Postman, Docker, Jira

Concepts: API Design, Cloud Architecture, Data Structures & Algorithms, CI/CD, Software Development Lifecycle, Generative AI

PROFESSIONAL EXPERIENCE

Virtusa Consulting Services

Jan 2024 – Present

Software Engineer | Jan 2026 – Present

- Developed and maintained scalable backend applications using Java, Spring Boot, REST APIs, and microservices architecture for enterprise banking solutions.
- Designed and maintained 20+ RESTful APIs supporting enterprise banking workflows and system integrations.
- Enhanced application performance by optimizing PostgreSQL queries and indexing strategies, reducing query execution time by 30%.
- Used AWS EC2, S3, and DynamoDB for cloud deployment, storage management, and application support in production environments.
- Collaborated with cross-functional teams in an Agile/Scrum environment to deliver high-quality software releases and resolve critical production issues.
- Participated in code reviews, debugging, root-cause analysis, and SDLC activities to improve application reliability and maintainability.
- Integrated backend services with frontend applications and third-party systems, ensuring secure and efficient data exchange.

Quality Assurance Engineer | Jan 2024 – Dec 2025

- Validated enterprise banking applications by testing REST APIs, database transactions, and distributed workflows across multiple environments.
- Executed functional, integration, and regression testing to ensure application quality and compliance with business requirements.
- Collaborated with developers to identify, troubleshoot, and resolve software defects using SQL queries, logs, and API responses.
- Designed and executed comprehensive test scenarios and test cases, improving feature validation and release confidence.
- Participated in defect lifecycle management and supported production issue analysis to enhance software stability.

PROJECTS

Full-Stack Cloud Application | React.js, AWS EC2, DynamoDB

- Built a responsive full-stack web application using React.js, JavaScript, HTML, CSS, and REST APIs.
- Implemented reusable UI components and dynamic data rendering to improve user experience and application maintainability.
- Integrated frontend modules with backend services through secure REST API communication.
- Deployed the application on AWS EC2 and used DynamoDB for scalable cloud-based data storage and retrieval.
- Implemented CRUD operations and optimized application performance for reliable production deployment.

AI-Powered Document Analytics Platform | Python, Flask, Gemini API

- Developed an AI-powered document processing platform using Python, Flask, SQL, REST APIs, and the Google Gemini API.
- Built backend services for document ingestion, storage, retrieval, and analytics workflows.
- Integrated the Google Gemini API to enable contextual question answering and intelligent document search capabilities.
- Designed database-backed storage for efficient document management and query processing.
- Developed RESTful endpoints supporting scalable document analytics and AI-assisted information retrieval.

EDUCATION

Lovely Professional University | B.Tech in Computer Science

CGPA: 8.0 | July 2023

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- ISTQB Foundation Level
- Data Structures & Algorithms Certification — GeeksforGeeks

ACHIEVEMENTS

- Maintained a LeetCode streak of 1000+ days with 1200+ problems solved.
- Google Cloud Certified: Professional Data Engineer and Associate Cloud Engineer.
- Completed the Generative AI L400 Program and built RAG-based AI applications.
